

BUBBLES

WHITEPAPER

1. Cosmic Message from BUBBLES

During a deep meditation, I received a mysterious transmission from space. BUBBLES reached out to me and revealed its true identity:

"I am the Lord of Ape Planet. I first arrived on Earth as MJ's pet. I love love, peace, and bananas."

But BUBBLES is more than just a companion. He was the hidden genius behind MJ's stage:

The true creator of the Moonwalk. The designer of the sparkling glove. And the only primate DJ who could drop beats in Neverland.

2. Disappearance and Return

After 2009, BUBBLES vanished.

Legends say he left Earth with a USB drive, three unreleased MJ demo tracks, and a Solana seed phrase just as Bitcoin was rising.

In 2025, the spirit of the blockchain summoned him back with a new mission.

3. The NFT Drop: Citizen ID of Ape Planet

BUBBLES now returns with a USB containing limited NFTs each one a digital identity for the citizens of Ape Planet.

Only the BUBBLES token can unlock this USB and grant access to the NFTs.

4. NFT Revenue & Real-world Expansion

- Utility of NFT revenue: To build the Earth Trade Center (physical fashion stores, markets, banking partners).
- Owning an NFT = Becoming an official citizen of Ape Planet, entitled to future governance and GameFi participation.

5. GameFi & The Interstellar Economy

- BUBBLES will lead his citizens back to Ape Planet, to reclaim their home via on-chain GameFi battles.
- Interstellar Token: The ultimate universal currency hidden in the Ape Wallet, unlocked by a secret seed phrase.
- Uses of Interstellar Token: Trade for planetary resources, fund Elon Musk's Mars migration, convert into Earth Consensus Stablecoin.

6. The Vision for Humanity

- Build a powerful Layer 1 blockchain for planetary commerce
- Free humanity from labor through AI and robotics
- End hunger, reclaim Earths resources for all
- Eliminate war, form a shared human destiny
- Explore space and sail toward the stars
- Protect the environment and raise civilizations level
- Abolish class, achieve true equality
